

CLIMATE EXPERTS

"Climate Experts" is a board game in which you collaborate with others towards a more sustainable future.

There are three kinds of cards in the pack:

Pack 1. Cards about different climate cases, which instruct the players on how to move their pawns.

Pack 2. Task cards, which give the group a common task to consider and contemplate.

Pack 3. Question cards, which include the True or False questions.

An easier version:

» You have a shared pawn to move. Each player throws the dice in their turn and the shared pawn is moved accordingly.

A more difficult version:

» Each player throws the dice in their turn. The number on the dice indicates the pack from which the card is picked up (1, 2 or 3).

Playing the game:

» The person who threw the dice will pick up the card and read it out loud.

» In the case of the question cards and the task cards, giving the right answer or completing the given task rewards the participant with two steps forward. Wrong answers or failing to complete the task leads to taking one step back. All the tasks must be completed and all the questions must be answered in collaboration with the whole group. The question cards include the right answer so the one reading the card cannot participate in answering the question.

» The goal is to cross the finish line and to achieve a sustainable future before the cards run out.
